
Plantillas: Rápido y Furioso

Dentro de los salones de belleza, las plantillas de aluminio se han convertido en un método muy común para agregar reflejos al cabello de los clientes. Habiendo sido un estilista por casi 30 años, he visto la técnica de las plantillas transformarse de colocar unas pocas plantillas para agregar variables colores al cabello; a una herramienta sobre usada para crear reflejos en todo el cabello, los cuales creo provienen de una falta de entrenamiento por parte del estilista y es su manera de Plantillas: Rapido y provechoso (Spanish Edition) crear lo que debería ser una coloración a rubio.

Realicé “Plantillas: Rápido y Furioso” para explicar cómo ubicar las plantillas de manera fácil y sencilla y que permita una buena ganancia al salón de belleza mientras provea a los clientes un excelente look. Estas colocaciones están explicadas simplemente para que así, hasta los estilistas menos experimentados puedan aprender fácil y rápidamente.

En todas las aplicaciones he utilizado menos de 20 plantillas de papel aluminio, haciéndolo simple, fácil de aprender y recordar. Hay dos excepciones, por supuesto, estas son: Plantillas en cabellera completa y platillas en media cabellera. En estas dos particularmente, se usan 40 para la primera y 26 para la segunda. Estas son las ubicaciones que uso en mi salón diariamente.
