## What's with the Fish?

Almost everyone who saw the book cover in the design phase simultaneously loved it and then asked about the meaning of the fish jumping out The Mobile Marketing Handbook: A Step-by-Step Guide to Creating Dynamic Mobile Marketing Campaigns of the phone. So here is what's with the fish:

- Marketers feel much the same as a fish out of water when trying to figure out mobile marketing. It is just too different from what they expect, and it keeps changing even when they think they have it figured out.
- To young people, having a mobile phone is part of life, and life is exciting. Mobile is always there for them and a part of being connected to the world. Why wouldn't a fish The Mobile Marketing Handbook: A Step-by-Step Guide to Creating Dynamic Mobile Marketing Campaigns jump out of it?
- Mobile marketing brings phones to life in unexpected ways. Granted, no one would want a real fish to spring forth from his or her phone, but look at it as a metaphor for thinking outside the box about what you can do with your mobile device.

What do *you* think the fish means? Share your thoughts with me at [kim@mobilemarketingprofits.com](mailto:kim@mobilemarketingprofits.com).
