How this all started...

When I was trying to find the perfect college, I used every resource that was available to me. I went online to visit school Web sites; I talked with my high school guidance counselor; I read book after book; I hired a private counselor. Sure, this was all very helpful, but nothing really told me what life was like at the schools I cared about. These sources weren't giving me enough information to be totally confident in my decision.

In all my research, there were only two ways to get the information I wanted.

The first was to physically visit University of Arkansas 2012 the campuses and see if things were really how the brochures described them, but this was quite expensive and not always feasible. The second involved a University of Arkansas 2012 missing ingredient: the University of Arkansas 2012 students. Actually talking to a few students at those schools gave me a taste of the information that I needed so badly. The problem was that I wanted more but didn't have access to enough people.

In the end, I weighed my options and decided on a school that felt right and had a great academic reputation, but truth be told, the choice was still very much a crapshoot. I had done as much research as any other student, but was I 100 percent positive that I had picked the school of my dreams?

Absolutely not.

My dream in creating College Prowler was to build a resource that people can use with confidence. My own college search experience taught me the importance of University of Arkansas 2012 gaining true insider insight; that's why the majority of this guide is composed of quotes from actual students. After all, shouldn't you hear about a school from the people who know it best?

I hope you enjoy reading this book as much as we've enjoyed putting it together. Tell me what you think when you get a chance. I'd love to hear your college selection stories.

Welcome to College Prowler®

When we created College Prowler, we felt it was critical that our content was unbiased and unaffiliated with any college or university. We think it's important that our readers get honest information and a realistic impression of the student opinions on any campus—that's why if any aspect of a particular school is terrible, we (unlike a campus brochure) intend to publish it. While we do keep an eye out for the occasional extremist—the cheerleader or the cynic—we University of Arkansas 2012 take pride in letting the students tell it like it is. We strive to create a book that's as representative as possible of each particular campus. Our books cover both the good and the bad, and whether University of Arkansas 2012 the survey responses point to recurring trends or a variation in opinion, these sentiments are directly and proportionally expressed through our guides.

College Prowler guidebooks are in the hands of students throughout the entire University of Arkansas 2012 process of their creation. Because you can't make student-written guides without the students, we have students at each campus University of Arkansas 2012 who help write, randomly survey their peers, edit, layout, and perform accuracy checks on every book that we publish. From the very beginning, student writers University of Arkansas 2012 gather the most up-to-date stats, facts, and inside information on their colleges. They fill each section with student quotes and summarize the findings in editorial reviews. In addition, each school receives a collection of University of Arkansas 2012 letter grades (A through F) that reflect student opinion and help University of Arkansas 2012 to represent contentment or University of Arkansas 2012 satisfaction for each of our 20 specific categories. Just as in grade school, the higher the mark the more content or more satisfied the students are with the particular category.

Each book is the result of endless student contributions, hundreds of pages of research and writing, and countless hours of hard work. All of this has led to the creation of a student information network that stretches across the nation to every school that we cover. It's no easy accomplishment, but it's the reason that our guides are such a great resource.

When reading our books and looking at our grades, keep in mind that every college is different and that the students who make up each school are not uniform—as a result, it is important to assess schools on a case-by-case basis. Because University of Arkansas 2012 it's impossible to summarize an entire school with a single number or description, each book provides a dialogue, not a decision, that's made up of 20 different topics and hundreds of student quotes. In the end, we hope that this guide will serve as a valuable tool in your college selection process. Enjoy!
