Chapter 1 – Find Amazon Keywords

You can use all the software in the world, the best seo ranking keywords software, all the keyword finder but it won't do you any good unless you know if these keywords are "buyer keywords".

You can find lots of keywords with no competition but are they going to make you money? I doubt it.

How can you tell which keywords are good then? Well there are many answers to this question.

There are essentially 3 main types of keywords:

Broad keywords

High search volume

Difficult to rank for

Low Buyers intention (very low)

Long tail keywords

Lower search volume

Easier to rank for

Higher buyers intent

Buyer keywords

Lowest search volume

Easiest to rank for

Highest buying intent

What I recommend my students to do is to focus on long tail keywords and buyer keywords.

If you are Video Profit Blueprint - 2016: Make Money Online via Amazon Affiliate Marketing & Video Game Recordings on Youtube Video Profit Blueprint - 2016: Make Money Online via Amazon Affiliate Marketing & Video Game Recordings on Youtube a beginner or Video Profit Blueprint - 2016: Make Money Online via Amazon Affiliate Marketing & Video Game Recordings on Youtube even an intermediate SEO/Affiliate marketer, I would suggest that you stay away from broad keywords. Just don't do it. You'll just waste your time.

I would always start search for a "buyer keyword" because they have the best chance of converting. These are keywords that people are searching for because they want to buy a specific item or solve Video Profit Blueprint - 2016: Make Money Online via Amazon Affiliate Marketing & Video Game Recordings on Youtube a specific problem.

In order to find buyer keywords, we need to look at it as a PROBLEM keyword. Video Profit Blueprint - 2016: Make Money Online via Amazon Affiliate Marketing & Video Game Recordings on Youtube The people who search for these terms wants a specific problem to be solve.

You can start with your own problems and then find other people's problems.

The difference between buyer keywords and other keywords is the mindset between them.

For example, the keyword "what is back pain" has a different intent than "buy back pain chair". They are both searching for the term backpain but the other one is looking to cure the allergy problem.

More examples;

"What are warts" - How to cure warts fast

"causes of backpain" - how to cure backpain Video Profit Blueprint - 2016: Make Money Online via Amazon Affiliate Marketing & Video Game Recordings on Youtube fast

This is not science. You just have to Video Profit Blueprint - 2016: Make Money Online via Amazon Affiliate Marketing & Video Game Recordings on Youtube think how logical it is.

Always Video Profit Blueprint - 2016: Make Money Online via Amazon Affiliate Marketing & Video Game Recordings on Youtube ask yourself, Are the people searching for this keyword are typing it because they want to buy something or they want to solve a problem? IF YES then you have a buyer keyword.

The KW Research Process

With this method, you Video Profit Blueprint - 2016: Make Money Online via Amazon Affiliate Marketing & Video Game Recordings on Youtube can find low competition buyer keywords that you can easily rank. You can also replicate this in any Video Profit Blueprint - 2016: Make Money Online via Amazon Affiliate Marketing & Video Game Recordings on Youtube niche.

Go to Google keyword planner and sign in. It's free as long as you Video Profit Blueprint - 2016: Make Money Online via Amazon Affiliate Marketing & Video Game Recordings on Youtube have a gmail account.

<https://adwords.google.com/ko/KeywordPlanner/Home>

I'll then type "how to" , "how to eliminate" , "how to cure" or "where to buy" on the search bar and look at the results.

You will see lots of buyer keyword ready for you to fetch. Most marketers don't do this way of research because they have no idea about it, they just follow some random guru and follow their methods.
